

Helia

LIGHT UNLEASHED

A Visual Signature

An elegant and recognizable silhouette, designed to enhance spaces with bespoke finishes.

Helia combines elegance and functionality with a design created to:

- Enhance spaces
- Create visual landmarks
- Blend naturally into all environments

Technological Precision

Optimized technology for maximum performance, integrated into a sleek and functional design.

Helia features:

- An ultra-thin, transparent square photovoltaic panel
- Dual function: lighting and RGB LED marking
- An extra-thin, linear, and adjustable LED module, offering wide light distribution

Light Without Limits

An autonomous and easy-to-deploy solution to illuminate where it is needed.

Helia frees public lighting from constraints:

- Quick installation, without heavy works
- 365 nights of guaranteed lighting per year
- Programmable and remotely controllable
- No maintenance required for up to 10 years

Why Choose Helia?

Helia combines sculptural design, advanced technology, and unprecedented installation freedom. Where aesthetics and innovation meet, the rules of lighting change:

Helia does not just light up, it liberates light.

Are you ready to unleash the light?

With Helia, public lighting becomes a strategic lever for safer, more attractive, and modern communities. A solution free from technical constraints.
